

Animation Workshop

Students learn all aspects involved in stop motion animation.

Students prepare their storyboards, develop their characters, make their characters and backdrops from clay and learn how to “shoot” each scene in their stop motion film.

Students are also taught how to make animated films by using computer software animation packages. They learn how to make their characters move, jump, bow, dance and so on. They also learn how to create different backgrounds for each scene. Their finished work is saved daily on to DVD.
