

Film & Cinematography

Students learn how to write scripts. They learn to write for the stage and screen.

They learn how to carry out all aspects of making a film from performing to camera work to lighting and sound, costume design, directing, producing and editing their work. They are shown and practice camera work and the effect of lighting on each scene on a daily basis. They work in groups to produce their daily films.

Each student takes turns at carrying out each role. Individual and group work is edited and saved daily on to DVD.
