

The Photography workshop teaches students about their own cameras, their functions and lenses, capturing the light, motion and depth, composition, how much light is enough, understand shutter speed, aperture, decide on a style, how to edit your images, essential photography lenses and their uses, key photography accessories and their uses and lots more.

Students go on three fieldtrips on this course and have to complete specific exercises under the guidance of their qualified and experienced tutor.

Every student completes an individual portfolio each week.
